Special Track on Metadata & Semantics for Digital Humanities and Digital Curation (DHC2023)

http://www.mtsr-conf.org/index.php/tracks

The 17th International Conference on Metadata and Semantics Research (MTSR 2023), will be held at the University of Milano-Bicocca between 23rd - 27th October 2023.

Important Dates

- 16th July, 2023: Submission deadline (Full and Short papers)
- 16th July, 2023: Submission deadline (Posters, Workshops, Tutorials, Demos & Panels)
- 27th August, 2023: Notification of decision
- 24th September, 2023: Camera-ready papers due
- 23rd - 27th October 2023 Conference at the University of Milano-Bicocca

Aim and Scope

Ontologies are the central components of semantic tools and have been present in the art and cultural area for some time. For instance, the CIDOC Conceptual Reference Model (CRM) supports the integration, communication and the exchange of differently structured information from the cultural heritage field. Meanwhile, there are some projects that already use these semantic technologies. For instance, a project of the British Museum (http://collection.britishmuseum.org), allows the collection of all available data as Linked Open Data (LOD). Also, the implemented EU project Europeana (http://www.europeana.eu/portal/) focuses on the global accessibility of cultural information as LOD. According to the EU Commission, a prominent role for the future of the European knowledge and information society is played by sharing the electronic content. In 2009, the German Federal Government had decided to create a German Digital Library (Deutsche Digitale Bibliothek, www.deutschedigitalebibliothek.de), which should link numerous German cultural and scientific facilities and integrate them at European level in the Europeana.

The aim of this Special Track is to discuss the role of semantics and metadata in combination with the personalization and adaptation of information and knowledge. We invite the community to a discussion in which we will try to find new creative ways to handle semantic technologies in cultural heritage, especially in digital humanities and digital curation. Furthermore, DHC aims at improving the exchange of ideas between different communities involved in research concerning, among other history, educational science, digital humanities, visualization, machine learning, information retrieval, data mining, HCI, etc. The Special Track is especially intended for researchers working on multidisciplinary tasks who want to discuss problems and synergies.

Topics

- The topics of interest include, but are not limited to, the following aspects: Semantic-based data mining and information retrieval
- Semantic-based profiling, clustering and collaborative filtering
- Use of Semantic-based technologies in cultural heritage
- Information Discovery Systems and Recommendations
- Integration of metadata and semantic research into digital humanities and digital curation
- Open Repositories and Research Infrastructures

The participants are also encouraged to address the following questions:

- What is semantics?
- Which benefits come from semantic technologies for cultural heritage?
- In what ways can semantics improve Digital Humanities?
Submission procedure
The following types of submissions are invited:

- Full papers (12 pages, CCIS format) reporting completed research
- Short papers (6 pages, CCIS format) presenting ongoing or preliminary research
- Presentations and Posters (3-4 pages)
- Proposals for Tutorials, Workshops, Demos and Panels (1-3 pages providing a description)

Submissions should be original and not previously submitted, published and under review to other Conferences or Journals. All submissions will be reviewed on the basis of relevance, originality, importance and clarity following a double-blind peer review process. Submitted papers have to follow the LNCS proceedings formatting style and guidelines. Authors of accepted submissions will be asked to register to the Conference and present their work in the form of either oral presentation or poster presentation.

Interested authors can submit to EasyChair (https://easychair.org/conferences/?conf=17mtsr2023)

Conference Proceedings
Proceedings will be published by Springer in CCIS (Communications in Computer and Information Science) book series (http://www.springer.com/series/7899). CCIS is abstracted/indexed in Scopus, SCImago, EI-Compendex, Mathematical Reviews, DBLP, Google Scholar. CCIS volumes are also submitted for inclusion in ISI Proceedings.

Other Publication Opportunities
Selected papers might be considered for a revised and extended version to be published in a range of international journals, including the International Journal of Metadata, Semantics and Ontologies (Inderscience) and Data Technologies and Applications (Emerald), previously published as Program.

Awards
There are two types of awards: the Best Paper award and the Best Student Paper award, both sponsored by euroCRIS (http://www.eurocris.org/).

- Best Paper award: This award will be presented to the authors of the best full research paper submitted and presented to the conference.
- Best Student Paper award: MTSR sponsors a paper competition to recognize excellence in a conference paper contribution whose primary author is a student (normally at a PhD or MRes level). The student is required to present the paper at the MTSR 2023 conference. Submissions are evaluated on their originality, scientific merits, structure, and clarity of composition.

The author of an awarded paper, and co-authors if any, will be entitled to:

- Receive a signed and stamped official award certificate by the conference organizers
- Promote their achievement on MTSR conference webpage, and MTSR Social Media
- Get invited to submit an extended and revised version of the awarded paper for publication in the International Journal of Metadata, Semantics and Ontologies (Inderscience)
  - Each award comes with the price of a free access/registration to next year’s MTSR. Including all conference materials, together with the printed/digital conference proceedings.
  - This voucher, in case of many co-authors, is valid only for one author of the awarded paper, and only for the MTSR conference that follows the year after receiving the award.

Special Track Chairs
- Ernesto William De Luca, Georg-Eckert-Institute – Leibniz-Institute for international Textbook Research, Germany
- Francesca Fallucchi, Guglielmo Marconi University, Italy
- Riem Spielhaus, Georg-Eckert-Institute – Leibniz-Institute for international Textbook Research, Germany
Program Committee

- Maret Nieländer, Georg-Eckert-Institute – Leibniz-Institute for international Textbook Research, Germany
- Elena González-Blanco, Universidad Nacional de Educación a Distancia, Spain
- Steffen Hennicke, Georg-Eckert-Institute – Leibniz-Institute for international Textbook Research, Germany
- Ana García-Serrano, ETSI Informática - UNED, Spain
- Philipp Mayr, GESIS, Germany
- Noemi Scarpato, San Raffaele Roma Open University, Italy
- Andrea Turbati, University of Rome Tor Vergata, Italy
- Christian Scheel, Georg-Eckert-Institute – Leibniz-Institute for international Textbook Research, Germany
- Armando Stellato, University of Rome, Tor Vergata, Italy
- Wolf-Tilo Balke, TU Braunschweig, Germany
- Andreas Lommatzsch, TU Berlin, Germany
- Ivo Keller, TH Brandenburg, Germany
- Gabriela Ossenbach, UNED, Spain
- Francesca Fallucchi, Guglielmo Marconi University, Italy
